PROFESSIONAL SUMMARY

Senior software engineer, 10 years of production web and SaaS. Last year: remote contract with a Norwegian client (Osilion AS) — owned an AI recruitment platform and a lead-generation platform (C#, ASP.NET Core, EF Core, Azure, Python, React, Next.js). Before that, eight years PHP (Laravel, Symfony), Vue / Nuxt, MySQL / PostgreSQL: booking, marketplaces, CRMs. I operate CoreBari (corebari.com): live multi-tenant suite, SSO, offline-first sync, local payments. Deepest backend is still PHP; I am productive in .NET from a year of production work I architected. I use AI as an accelerator and I review everything I ship.
