PROFESSIONAL SUMMARY

Senior full-stack engineer, 10 years of production SaaS and business systems. Deepest frontend is Vue.js 3 / Nuxt. This past year I shipped React and Next.js (App Router) in production for a Norwegian client — recruitment and lead-generation products — with TypeScript, plus C# / ASP.NET Core and Python. Before that, eight years of Vue on Laravel / Symfony APIs. I also build CoreBari (corebari.com) in Next.js / Node / PostgreSQL: multi-tenant apps, SSO, offline-first PWA sync. I own UI through deploy. I use AI to implement faster; I do not ship frontend I cannot debug.
