PROFESSIONAL SUMMARY

Senior software engineer, 10 years of production web systems. Eight years PHP — Laravel and Symfony with Vue — booking platforms, multi-vendor marketplaces, and CRMs. Last year: remote contract with a Norwegian startup (Osilion AS), owning an AI recruitment product and a lead-generation platform on C# / ASP.NET Core, React / Next.js, and Azure — same problems as Laravel (container, ORM, auth, queues, API boundaries), different syntax. I also operate CoreBari (corebari.com), a live multi-tenant SaaS suite with SSO, offline-first sync, and bKash/Nagad. I own features end to end. I use AI to implement faster; I design the architecture and I do not ship what I cannot explain.

TECHNICAL SKILLS

Backend: PHP 8.x, Laravel, Symfony, REST APIs, Eloquent, Doctrine, queues/jobs, Sanctum, JWT

Frontend: Vue.js 3, Nuxt, React, Next.js, TypeScript, JavaScript, Tailwind CSS

Databases: MySQL, PostgreSQL, SQL Server / Azure SQL, query optimization, migrations

DevOps: Docker, Git, GitHub Actions, CI/CD, Linux, Composer

Also this year: C#, ASP.NET Core, Entity Framework Core, Node.js, Python, Azure, Supabase

Practices: API design, payment-gateway integration, legacy modernization, unit testing, code review, mentoring

PROFESSIONAL EXPERIENCE

OSILION AS — Senior Full-Stack Engineer (Contract)

Sep 2025 – Present

Remote — Norway (osilion.no)

- Owned the AI recruitment product end to end (postings, intake, CV processing, AI interviews, scoring). C# / ASP.NET Core / EF Core / Azure SQL and React / Next.js. Layered the same way I do in Laravel — domain rules stay in from HTTP and persistence. Candidate filters were composable query rules (Specification) so the repository did not grow duplicate methods.
- Shipped a lead-generation platform (Python, Supabase, Next.js on Render): ingest, store, bulk email. Sends ran off the request; a retry had to be safe to run twice.
- JWT, Azure SQL + Key Vault, GitHub Actions on Azure and Render. Backend work on a sales CRM on the same small team.

DEVVOYAGE — Senior Software Engineer

Jul 2023 – Aug 2025

Remote

- Built travel, e-commerce, and CRM systems in Laravel / Symfony and Vue, including booking flows with availability, pricing, reservation, and checkout.
- Designed REST APIs and integrated payment gateways and other third-party services for booking and checkout.
- Extracted reusable Laravel / Symfony packages, backend services, and Vue components reused across client projects.
- Tuned MySQL schemas and queries on production booking data. Set up CI/CD. Mentored juniors through code review.

L2N SOFTWARE LIMITED — Software Engineer (Full Stack)

Aug 2018 – Jun 2023

Dhaka, Bangladesh

- Five years of Laravel, Symfony, Vue, and MySQL / PostgreSQL for travel and property clients.
- REST APIs and third-party integrations for booking, payments, and business workflows.
- Refactored legacy PHP into Laravel / Symfony and improved query efficiency on the modules we modernized.
- Delivered full-stack features from schema and Eloquent / Doctrine models through APIs to Vue UI. Introduced unit testing practice; mentored juniors on framework conventions.

QAHHAR LIMITED — Software Developer (Full Stack)

Dhaka, Bangladesh

Jan 2018 – Jul 2018

Built, tested, and deployed PHP client applications; upgraded legacy systems.

ICON IT SOLUTION — Senior Web Developer (Full Stack)

Dhaka, Bangladesh

Jan 2016 – Dec 2017

Built client web applications and customized CMS/e-commerce features; worked with clients on delivery and QA.

SELECTED WORK

CoreBari (corebari.com) — independent SaaS, live — Multi-tenant suite (POS, diagnostics lab, attendance/payroll, invoicing) with SSO across apps, offline-first PWA sync, and bKash/Nagad payments. *Next.js · Node.js · TypeScript · PostgreSQL*

Travel management system — End-to-end booking platform that replaced manual booking and customer-management workflows. *PHP / Symfony · Vue.js · MySQL · REST APIs*

Multi-vendor tour marketplace — Vendor management, availability, checkout, and payment-gateway integration, run in production for real customer traffic. *PHP · Vue.js · MySQL*

CRM platform — Customer records, sales workflows, and reporting for business clients. *PHP · Laravel / Symfony · MySQL / PostgreSQL*

EDUCATION

B.Sc. in Computer Science & Engineering — Pabna University of Science & Technology, Bangladesh · 2011 – 2015
