PROFESSIONAL SUMMARY

Senior Software Engineer with 10 years of experience building production web applications, SaaS platforms, and business systems for international and local clients. For the past year, engineering AI-powered SaaS products for a Norwegian client — leading full-stack development of an AI recruitment platform and an automated lead-generation platform using C#, ASP.NET Core, EF Core, Azure, Python, React, and Next.js. Built on 8+ years of deep PHP (Laravel, Symfony), Vue/Nuxt, and MySQL/PostgreSQL experience delivering booking systems, marketplaces, CRMs, and healthcare applications end to end.

TECHNICAL SKILLS

Languages: PHP, C#, TypeScript, JavaScript, Python, SQL

Backend: Laravel, Symfony, ASP.NET Core, .NET, Entity Framework Core, Node.js, REST APIs

Frontend: Vue.js, Nuxt, React, Next.js, Tailwind CSS, HTML5/CSS3

Databases & ORM: MySQL, PostgreSQL, SQL Server / Azure SQL, MongoDB, Supabase, Eloquent, Doctrine, Drizzle ORM

Cloud & DevOps: Azure (App Services, Azure SQL, Key Vault, Static Web Apps), Render, Docker, GitHub Actions, CI/CD, Linux

Architecture & Practices: Domain-Driven Design, Repository & Specification patterns, Authentication/Authorization (JWT, OAuth), Third-Party API Integration, Unit Testing, Code Review, Agile/Scrum

PROFESSIONAL EXPERIENCE

OSILION AS — Senior Full-Stack Engineer (Contract)

Sep 2025 – Present

Remote — Norway (osilion.no)

- Led end-to-end development of an AI-powered recruitment platform — job postings, candidate management, CV processing, AI-driven interviews, scoring, and feedback workflows — using C#, ASP.NET Core, Entity Framework Core, Azure SQL, and a React/Next.js frontend.
- Designed the backend on Domain-Driven Design principles with layered architecture (Domain, Application, Infrastructure, Web API) and Repository/Specification patterns, keeping the codebase testable and maintainable as features scaled.
- Built and shipped an automated lead-generation platform with integrated bulk email outreach, owning the full stack from data pipeline to campaign delivery (Python, Supabase, Next.js, deployed on Render).
- Contributed backend features to a sales CRM (pipeline management, lead import/scraping, automated customer email campaigns) and to a 3D container-design solution as part of a small multi-product team.
- Implemented authentication/authorization with JWT, database migrations, third-party API integrations, and cloud configuration; debugged and resolved production issues across services.
- Deployed and operated services on Azure (Azure SQL, Key Vault, Static Web Apps) and Render with CI/CD via GitHub Actions.

DEVVOYAGE — Senior Software Engineer

Jul 2023 – Aug 2025

Remote

- Built enterprise travel, e-commerce, and CRM solutions with custom booking systems and scalable backend architecture using PHP (Laravel, Symfony), Vue.js, and MySQL.
- Designed reusable components and backend services that accelerated feature delivery across client projects.
- Integrated third-party APIs and payment gateways to support end-to-end booking and checkout flows.
- Set up CI/CD pipelines that automated builds and deployments, making releases faster and more reliable; mentored junior developers through code reviews and engineering best practices.

L2N SOFTWARE LIMITED — Software Engineer (Full Stack)

Aug 2018 – Jun 2023

Dhaka, Bangladesh

- Developed and maintained custom web applications for travel and property clients using Laravel, Symfony, Vue.js, and MySQL/PostgreSQL over a five-year tenure.
- Designed RESTful APIs and integrated third-party services for booking, payment, and business workflows.
- Refactored and modernized legacy modules, improving maintainability, performance, and database query efficiency.
- Established unit testing and debugging practices, and mentored junior engineers on code quality.

QAHAR LIMITED — Software Developer (Full Stack)

Jan 2018 – Jul 2018

Dhaka, Bangladesh

- Developed, tested, and deployed client applications; debugged and upgraded legacy systems.

ICON IT SOLUTION — Senior Web Developer (Full Stack)

Jan 2016 – Dec 2017

Dhaka, Bangladesh

- Built responsive web applications and customized CMS/e-commerce features; worked directly with clients on tailored solutions and cross-browser QA.

KEY PROJECTS

- **CoreBari (corebari.com)** — **Independent SaaS product** — Multi-tenant suite of business apps (POS, diagnostics lab management, attendance/payroll, invoicing) with single sign-on, offline-first PWA sync, and bKash/Nagad payment integration — live in production. Next.js · Node.js · PostgreSQL · TypeScript
- **AI Recruitment Platform** — Full-stack SaaS automating recruitment with AI interviews, CV processing, and candidate scoring. C# · ASP.NET Core · EF Core · Azure SQL · React/Next.js · Azure
- **Automated Lead-Generation Platform** — Lead sourcing pipeline with automated email campaign delivery. Python · Supabase · Next.js · Render
- **Travel Management System** — End-to-end booking platform that replaced manual booking and customer-management workflows with automated processes. PHP/Symfony · Vue.js · MySQL · REST APIs
- **Multi-Vendor Tour Marketplace** — Multi-vendor booking marketplace with vendor management, availability, and secure payment-gateway integration, run in production for real customer traffic. PHP · Vue.js · MySQL · Payment Gateways

EDUCATION

B.Sc. in Computer Science & Engineering

2011 – 2015

Pabna University of Science & Technology, Bangladesh
