PROFESSIONAL SUMMARY

Senior software engineer with 10 years delivering production web applications, SaaS platforms, and business systems for clients in Europe and Bangladesh. Eight of those years in PHP — Laravel and Symfony with Vue — building products including booking platforms, multi-vendor marketplaces, and CRM systems end to end. Spent the past year on remote contract for a Norwegian client, shipping four products in twelve months on a small engineering team, including an AI recruitment platform owned end to end on C# and ASP.NET Core. Works across the full stack: data modelling, API design, third-party and payment integrations, background processing, and deployment.

TECHNICAL SKILLS

Languages: PHP, TypeScript, JavaScript, C#, Python, SQL

Backend: Laravel, Symfony, ASP.NET Core, EF Core, Node.js, REST APIs, queues and background jobs

Frontend: Vue.js 3, Nuxt, React, Next.js, TypeScript, Tailwind CSS

Databases: MySQL, PostgreSQL, SQL Server / Azure SQL, Supabase, schema design, query optimisation, migrations

Cloud & DevOps: Azure (Azure SQL, Key Vault, Static Web Apps), Render, Docker, Git, GitHub Actions, CI/CD, Linux

Engineering: Layered / DDD structure, Repository and Specification patterns, JWT authentication, payment and third-party integrations, unit testing, code review, mentoring

PROFESSIONAL EXPERIENCE

OSILION AS — Senior Full-Stack Engineer (Contract)

Sep 2025 – Present

Remote — Norway (osilion.no)

- Owned the AI recruitment product end to end — job postings, candidate intake, CV processing, AI-conducted interviews, scoring, and feedback — built on C#, ASP.NET Core, EF Core, and Azure SQL with a React and Next.js frontend. One of four products delivered in twelve months on a small engineering team.
- Structured the backend in layers (Domain, Application, Infrastructure, Web API) with Repository and Specification patterns, keeping candidate filtering rules composable and testable as the product grew.
- Shipped a lead-generation platform from data ingest through to bulk email delivery using Python, Supabase, and Next.js, deployed on Render.
- Moved email sending off the request cycle into background jobs designed to be safe to retry, so provider failures could not duplicate or drop campaign deliveries.
- Implemented JWT authentication, database migrations, and third-party API integrations; handled secrets and deployment on Azure (Azure SQL, Key Vault, Static Web Apps) with GitHub Actions.
- Contributed backend features to a sales CRM as part of a small multi-product engineering team.

DEVVOYAGE — Senior Software Engineer

Jul 2023 – Aug 2025

Remote

- Built travel, e-commerce, and CRM systems in Laravel and Symfony with Vue.js frontends on MySQL, including custom booking engines covering availability, pricing, and reservation.
- Designed REST APIs and integrated payment gateways and third-party services for booking and checkout flows.
- Extracted reusable backend services and Vue component libraries that were reused across client projects.
- Tuned MySQL schemas and queries against production booking data.
- Set up CI/CD pipelines for automated builds and deployments; mentored junior developers through code review while working fully remotely with distributed clients.

L2N SOFTWARE LIMITED — Software Engineer (Full Stack)

Aug 2018 – Jun 2023

Dhaka, Bangladesh

- Five-year tenure building and maintaining custom web applications for travel and property clients using Laravel, Symfony, Vue.js, and MySQL / PostgreSQL.
- Designed REST APIs and integrated third-party services for booking, payment, and business workflows.
- Refactored legacy PHP into maintainable Laravel and Symfony code and improved query efficiency.
- Delivered features end to end, from database schema and ORM models through APIs to Vue interfaces.
- Introduced unit testing practice and mentored junior engineers on framework conventions.

QAHHAR LIMITED — Software Developer (Full Stack)

Jan 2018 – Jul 2018

Dhaka, Bangladesh

- Built, tested, and deployed PHP client applications; upgraded and stabilised legacy systems.

ICON IT SOLUTION — Senior Web Developer (Full Stack)

Jan 2016 – Dec 2017

Dhaka, Bangladesh

- Built client web applications and customised CMS and e-commerce features; worked directly with clients through delivery and QA.

SELECTED WORK

- **CoreBari (corebari.com) • independent SaaS product, live in production** — Multi-tenant SaaS suite of business applications — point of sale, diagnostics lab, attendance and payroll, invoicing — sharing one identity layer with single sign-on across apps, offline-first PWA synchronisation for unreliable connectivity, and mobile-wallet payment integrations. *Next.js • Node.js • TypeScript • PostgreSQL*
- **AI recruitment platform** — SaaS platform automating recruitment: CV processing, AI-conducted interviews, candidate scoring and feedback workflows. *C# • ASP.NET Core • EF Core • Azure SQL • React / Next.js*
- **Lead-generation platform** — Lead ingest pipeline with automated bulk email campaign delivery and retry-safe background sending. *Python • Supabase • Next.js • Render*
- **Travel management system** — End-to-end booking platform replacing manual booking and customer-management workflows. *PHP / Symfony • Vue.js • MySQL • REST APIs*
- **Multi-vendor tour marketplace** — Vendor management, availability, checkout and payment-gateway integration, run in production for real customer traffic. *PHP • Vue.js • MySQL*

EDUCATION

B.Sc. in Computer Science & Engineering

2011 – 2015

Pabna University of Science & Technology, Bangladesh
