PROFESSIONAL SUMMARY

Senior full-stack engineer with 10 years building production software across a wide range of products — including booking platforms, multi-vendor marketplaces, CRMs, and SaaS — for clients in Europe and Bangladesh. JavaScript and PHP throughout: Vue.js and Nuxt on Laravel and Symfony APIs across many of those years, and React and Next.js with TypeScript shipped in production this past year for a Norwegian client — four products in twelve months, including an AI recruitment platform delivered end to end. Owns features from interface through API and data model to deployment.

TECHNICAL SKILLS

Frontend: Vue.js 3, Nuxt, React, Next.js (App Router, SSR, Server Components), TypeScript, JavaScript (ES6+), Tailwind CSS

Backend: PHP, Laravel, Symfony, Node.js, REST APIs, queues and background jobs

Databases: PostgreSQL, MySQL, Supabase, Eloquent, schema design, query optimisation

Additionally: C#, ASP.NET Core, EF Core, Azure SQL, Python

Cloud & DevOps: Azure, Render, Docker, GitHub Actions, CI/CD, Linux

Engineering: API design, JWT authentication, payment and third-party integrations, layered / DDD structure, unit testing, code review, mentoring

PROFESSIONAL EXPERIENCE

OSILION AS — Senior Full-Stack Engineer (Contract)

Sep 2025 – Present

Remote — Norway (osilion.no)

- Owned the AI recruitment product end to end — React and Next.js interface with a C# and ASP.NET Core API, plus a Python service handling LLM-based CV scoring — covering job postings, candidate intake, CV processing, AI-conducted interviews, scoring, and feedback. One of four products delivered in twelve months on a small engineering team.
- Built and shipped a lead-generation platform in Next.js, TypeScript, and Supabase on Render, from data pipeline through to campaign delivery.
- Structured the backend in layers with Repository and Specification patterns on EF Core and Azure SQL, keeping candidate filters composable as features grew.
- Moved bulk email sending into background jobs designed to be safe to retry, so provider failures could not duplicate deliveries.
- Implemented JWT authentication, migrations, and third-party integrations; deployed on Azure (Azure SQL, Key Vault, Static Web Apps) and Render with GitHub Actions.
- Contributed features to a sales CRM as part of a small multi-product engineering team.

DEVVOYAGE — Senior Software Engineer

Jul 2023 – Aug 2025

Remote

- Built Vue.js frontends against PHP (Laravel, Symfony) backends for travel, e-commerce, and CRM products, including booking engines covering availability, pricing, and reservation.
- Created reusable Vue component libraries and backend services reused across client projects.
- Designed REST APIs and integrated payment gateways and third-party services for checkout flows.
- Set up CI/CD pipelines for builds and deployments; mentored junior developers through code review.

L2N SOFTWARE LIMITED — Software Engineer (Full Stack)

Aug 2018 – Jun 2023

Dhaka, Bangladesh

- Five-year tenure building Vue.js interfaces on Laravel and Symfony APIs with MySQL / PostgreSQL for travel and property clients.
- Delivered features from database schema and APIs through to responsive Vue interfaces for booking, payment, and business workflows.
- Modernised legacy modules and improved query efficiency.
- Introduced unit testing practice; mentored junior engineers.

QAHHAR LIMITED — Software Developer (Full Stack)

Jan 2018 – Jul 2018

Dhaka, Bangladesh

- Built, tested, and deployed PHP client applications; upgraded and stabilised legacy systems.

ICON IT SOLUTION — Senior Web Developer (Full Stack)

Jan 2016 – Dec 2017

Dhaka, Bangladesh

- Built client web applications and customised CMS and e-commerce features; worked directly with clients through delivery and QA.

SELECTED WORK

- **CoreBari (corebari.net) • independent SaaS product, live in production** — Multi-tenant SaaS suite of business applications — point of sale, diagnostics lab, attendance and payroll, invoicing — sharing one identity layer with single sign-on across apps, offline-first PWA synchronisation for unreliable connectivity, and mobile-wallet payment integrations. *Next.js • Node.js • TypeScript • PostgreSQL*
- **AI recruitment platform** — SaaS platform automating recruitment: CV processing, AI-conducted interviews, candidate scoring and feedback workflows, with LLM scoring in a separate Python service. *C# • ASP.NET Core • EF Core • Azure SQL • Python • React / Next.js*
- **Lead-generation platform** — Lead ingest pipeline with automated bulk email campaign delivery and retry-safe background sending. *Next.js • TypeScript • Supabase • Render*
- **Multi-vendor tour marketplace** — Vendor management, availability, checkout and payment-gateway integration, run in production for real customer traffic. *PHP • Vue.js • MySQL*
- **Travel management system** — End-to-end booking platform replacing manual booking and customer-management workflows. *PHP / Symfony • Vue.js • MySQL • REST APIs*

EDUCATION

B.Sc. in Computer Science & Engineering

2011 – 2015

Pabna University of Science & Technology, Bangladesh
